

Photographies préalables à la demande d'autorisation de défrichement.

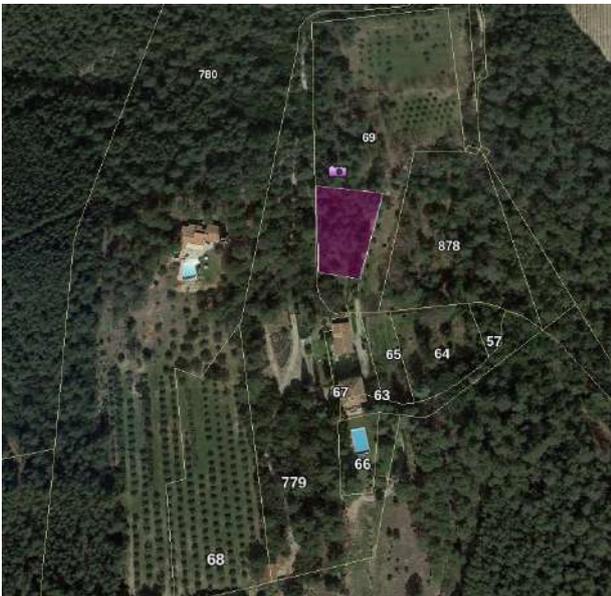

Plusieurs remarques :

- Il avait été demandé de prendre des photos « en contexte », avec si possible un recul d'~100 mètres. Ceci n'était que rarement possible, au vu de la situation des parcelles. La plupart du temps, elles ne sont entourées que de forêt, accessible par d'étroits chemins : la prise de recul était alors impossible.
- Les photos sont organisées par parcelles, une carte jointe précise l'emplacement de la prise de vue.
